

Exploring your environment

What can you find?

Environmental scientists called ecologists use a range of ways to investigate the natural environment. Using this Identification guide, see if you can find all the creatures and plants in our grassland. Once you have found all of them, count how many there are hiding in our grassland.

Can you find:

	Tick	How many did you find?
 Ants nest	<input type="checkbox"/>	<input type="text"/>
 Common Blue butterfly	<input type="checkbox"/>	<input type="text"/>
 Tortoiseshell butterfly	<input type="checkbox"/>	<input type="text"/>
 Bumblebee	<input type="checkbox"/>	<input type="text"/>
 Honey bee	<input type="checkbox"/>	<input type="text"/>
 Wasp	<input type="checkbox"/>	<input type="text"/>
 Harlequin ladybird	<input type="checkbox"/>	<input type="text"/>
 7-Spot ladybird	<input type="checkbox"/>	<input type="text"/>
 Stag beetle	<input type="checkbox"/>	<input type="text"/>
 Lesser stag beetle	<input type="checkbox"/>	<input type="text"/>
 Worm	<input type="checkbox"/>	<input type="text"/>
 Common daisy	<input type="checkbox"/>	<input type="text"/>
 Purple clover	<input type="checkbox"/>	<input type="text"/>
 Dandelion	<input type="checkbox"/>	<input type="text"/>
 Cornflower	<input type="checkbox"/>	<input type="text"/>
